#### Note:

Bobbin type listed in the traditional style, transformer design parameters to customer needs or to inject prevail.

#### EPC series high-frequency transformer features:

Has a low thermal resistance, low attenuation, high power, wide frequency range, light weight, reasonable structure, easy surface mount, good shielding effect, etc., but somewhat less heat dissipation.

#### Uses:

Widely used in small and large power and shielding and electromagnetic compatibility requirements of transformers, such as precision instruments, PABX power modules, navigation equipment.
